

# The brand, *specified.*

Corporate identity guidelines for Powerhouse Holdings, LLC —  
the standard every application of the brand is held to.

# Contained *energy*.

The name promises power. The brand's discipline is to hold it — the way a holding company should.

The identity is built on one motif: **the charged seam** — a single precise bolt of negative space cut through a solid plate. Energy, held in structure. It appears as the cut in the mark, as the vertical seam of light on hero surfaces, and nowhere else.

Everything around the seam stays quiet on purpose: near-black grounds, warm bone paper, hairline rules, generous space. The restraint is the message — a company confident enough not to shout.

This edition supersedes the original consumer-facing identity (electric lattice, saturated ultraviolet-and-lime). That energy survives here, matured: the violet deepened into a structural accent, the lime retired from corporate use, the voltage expressed through precision instead of glow. The legacy logotype is retained only in product-community contexts that predate this edition.

The mark — a solid plate, split by the charged seam.

## ESSENCE

Contained energy

## CHARACTER

Measured · precise · unhurried

## PROMISE

Software, held to a higher standard

# One plate. One *seam*.

Primary — bone on Obsidian

Inverted — ink on Bone

Ceremonial — bone on  
Ultraviolet Deep

Horizontal lockup — mark, name, qualifier

## CONSTRUCTION

The seam cuts the plate at a constant angle with one horizontal return — never redrawn freehand, never thickened.

## CLEAR SPACE

On all sides, no less than the width of the seam's horizontal return (the plate's quarter-width).

## MINIMUM SIZE

16 px digital / 5 mm print for the mark; below that, use the plate without the seam.

## WORDMARK

"POWERHOUSE" in Inter Tight Medium, tracked +23.5%; "HOLDINGS" in JetBrains Mono, tracked +20%, at 70% scale.

# Obsidian carries. Violet *signs*.

Proportion keeps the palette professional: roughly 70% ground, 20% paper, 8% structure, 2% signature.

|                                                                                                      |                                                                              |                                                                                 |
|------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------|---------------------------------------------------------------------------------|
|                                                                                                      |                                                                              |                                                                                 |
| <b>Obsidian</b><br>#0A0A0C<br>The ground. Carries the brand; most surfaces live here.                | <b>Ink</b><br>#101116<br>Raised surfaces and panels on Obsidian.             | <b>Bone</b><br>#F2F0EC<br>The paper. Warm inversion sections and print grounds. |
|                                                                                                      |                                                                              |                                                                                 |
| <b>Ultraviolet</b><br>#6F5BE8<br>The signature. Seams, focus, selection — structural, rarely filled. | <b>Ultraviolet Deep</b><br>#3B2F86<br>Ceremonial grounds and gradient depth. | <b>Brass</b><br>#C6A972<br>Premium emphasis. At most one element per view.      |

## ALWAYS

- Hold the 70 / 20 / 8 / 2 proportion across any composition.
- Use Ultraviolet for structure — rules, seams, focus states — before fills.
- Check text contrast: body copy on Obsidian is Bone at 92%+, never violet.
- Let hairlines and spacing do the separating before colour does.

## NEVER

- Introduce colours outside this palette — including the retired lime.
- Place Ultraviolet text on Obsidian at body sizes.
- Use gradients except violet-into-darkness on hero surfaces.
- Use Brass and Ultraviolet as competing accents in one view.

A serif that speaks. A grotesk that *works*.

Software, held to a *higher standard*.

DISPLAY — INSTRUMENT SERIF    REGULAR + ITALIC    TRACKING -1.8%    LEADING 0.94

ITALIC RESERVED FOR THE EMPHASISED PHRASE

Interface and body text is set in Inter Tight — neutral, contemporary, and invisible in the best sense. Weights 300–600 only; emphasis is Medium, never bold-on-bold.

TEXT — INTER TIGHT    300 / 400 / 500 / 600    BODY LEADING 1.65    TRACKING -1% TO 0

DATA, LABELS, AND EVIDENCE — JETBRAINS MONO • TRACKED WIDE • UPPERCASE

DATA — JETBRAINS MONO    400 / 500    TRACKING +16% TO +22%    EYEBROWS, FIGURES, CAPTIONS, TABLES

The hierarchy is fixed: serif for what we *believe*, grotesk for what we *explain*, mono for what we *measure*. If a layout needs a fourth voice, the layout is wrong.

#### DIGITAL SOURCES

Google Fonts: Instrument Serif · Inter Tight · JetBrains Mono

#### FALLBACKS

Times New Roman / system sans / system mono — declared in every stylesheet

#### PROHIBITED

Substituting typefaces, faux-bolding the serif, condensed display faces of any kind

# Measured. Precise. *Unhurried.*

Write like the software is built: no filler, no hype, every claim load-bearing.

## WE SOUND LIKE

- "Provisional in two seconds. Settled in four to six."
- "Nothing leaves the house without a human's approval."
- "Accuracy is measured, not assumed."

## WE NEVER SOUND LIKE

- "Revolutionary AI-powered game-changing solutions!!"
- Exclamation points, superlatives, or urgency theatre.
- Gamer slang, internet casing, or meme cadence — anywhere.

## Motion

**Easing.** One family: `cubic-bezier(.16, 1, .3, 1)`. Long decelerations, no bounce, no elastic. Entrances 0.9–1.25 s; micro-interactions 0.35–0.6 s.

**Vocabulary.** Masked line reveals for display type, soft rises for content, drawn rules, receding heroes, stacking plates. One seam of light per view — motion obeys the same scarcity as colour.

**Respect.** Reduced-motion preferences collapse every effect to instant, fully legible states. The document must read perfectly with no JavaScript at all.

**Where it lives.** The reference implementation is [powerhouseholdings.us](https://powerhouseholdings.us) — its stylesheet (`assets/css/site.css`) is the canonical token source for digital work.

# The brand is *held*, too.

These guidelines apply to the Powerhouse Holdings parent brand. Portfolio products — ChronoCal, Scorely, Cardonomics — carry their own product identities, each designed to sit comfortably beside the parent without imitating it.

Questions of application not covered here are settled by one test: *does it look like a company that would build our software?* If the answer is uncertain, it is no.
